INTERPHEX JAPAN / in-PHARMA JAPAN 2015 to be held at Tokyo Big Sight, Japan

Tokyo: The 28th INTERPHEX JAPAN and 9th in-PHARMA JAPAN will be held at Tokyo Big Sight from July 1st to 3rd, 2015 at the largest scale. Japan's renowned pharmaceutical expo attracts many professionals in the industry. The number of exhibitors has increased to over 1,000 companies, and 35,000 visitors are estimated to attend this pharmaceutical event in Tokyo.

INTERPHEX JAPAN is one of the world's leading pharmaceutical exhibitions, covering the whole process of pharmaceutical R&D and manufacturing, from all kinds of equipment to lab devices, contract services, packaging, and total solutions. in-PHARMA JAPAN is a concurrent show which is considered the best business platform for pharmaceutical ingredients suppliers to expand sales and network in the Japanese pharmaceutical industry. Firmly established as Japan's significant pharmaceutical expo for industry professionals, the event has been expanding its scale every year.

This must-go pharmaceutical event is organised by Reed Exhibitions Japan Ltd. which has a worldwide reputation for high-quality and large-scale exhibitions. Japan's largest trade show organizer has been contributing to the growth and innovation of the Japanese pharmaceutical industry for many years, generating new business opportunities for exhibitors and visitors.

One of the highlights of this year's INTERPHEX JAPAN / in-PHARMA JAPAN is the new zone called "Equipment Maintenance Zone" which is specalised in surface finishing, machining techniques, machine components/materials, and maintenance services. Other popular zones are the KOREA Pavilion and the INDIA Pavilion. These 2 large international pavilions will surely be more attractive with support from their national organizations.

Many brand-new products will be unveiled at the show this year as well. Just to name a few, a scaled up version of M Technique Co.'s forced thin-film microreactor, Ulrea SS-300, will be exhibited onsite. Nippon Becton Dickinson Company, Ltd. is going to perform demonstrations of the new MicroBio Ã?Å½Ã?Â¼3D colony rapid fully automated detection system. Kyoto

Electronics Manufacturing Co., Ltd. will also introduce their Electro Magnetically Spinning Viscometer publicly for the first time.

The Conference Program is also one of the main attractions of the event. The program offers a total of 140 sessions throughout the show period, covering the entire range of current issues and topics in the pharmaceutical field: pharmaceuticals, life science, drug discovery, cosmetic R&D, product planning and more. Participants can build up their knowledge, get the latest marketing trends, and learn the new technologies at one of the world's leading pharmaceutical exhibitions.
