Digital Non-Mydriatic Fundus Camera

Company: Crystalvue Medical

Dimension: 21x11x33.5

Weight: 2kg

Crystalvue Medical presented the first-ever Taiwan designed and manufactured digital non-mydriatic fundus camera for ophthalmology. The product is now available in the market.

The latest generation of non-mydriatic fundus camera is designed to capture and provide images of the eye as an aid to clinicians in the diagnosis of diabetic retinopathy, AMD, glaucoma and other retinal diseases. This modern ophthalmic instrument combines a simple method of image capture with superior image quality in a fast and efficient manner. It is easy-to-operate, and is ultra compact and portable in terms of design.
