Abdi Ibrahim selects rfxcel for FMD Compliance

August 2, 2018 | News

With the February 2019 FMD deadline fast approaching, Abdi Ibrahim needed a solutions provider that would enable them to become compliant in time for the FMD deadline, but additionally would fulfil their need for new, modern technological operations with data integrity at their core

Abdi Ibrahim, the Turkish pharmaceutical industry leader, has carefully selected rfxcel to implement and support new compliance management and serialisation processing software to ensure full compliance with current and future international legislative requirements ahead of the 2019 EU Falsified Medicines Directive (FMD) deadline.

With the February 2019 FMD deadline fast approaching, Abdi Ibrahim needed a solutions provider that would enable them to become compliant in time for the FMD deadline, but additionally would fulfil their need for new, modern technological operations with data integrity at their core.

After an in depth review, analysing several industry products and providers, Adbi Ibrahim selected rfxcel due to the solution's rich functionality as well as the company's Single Tenant private cloud deployment, its full-service implementation methodology, flexibility and speed and competitive pricing.

Adbi Ibrahim is currently mid-implementation with aims for the compliance management and serialisation processing software to be live during October 2018.
