OptraSCAN, Neuberg Diagnostics launch Global TELEPath Network

February 6, 2019 | News

Through this partnership, both the companies aim to expand their market base.

OptraSCAN Inc., global digital pathology solutions provider, and Neuberg Diagnostics, one of the Top 4 Diagnostics Service Provider in India, have announced the launch of Global TELEPath Network for the pathologist community in UAE, India and South Africa under a new partnership namely, “Neuberg DIGIPATH, Powered by OptraSCAN Inc.” at Medlab 2019, Dubai.

This new partnership brings to the table a whole new array of services related to digitization of tissue slides and telepathology with an objective of making new-age life-saving healthcare technology available to the human kind. The partnership promises access to a large pool of histopathologists from UAE, India and South Africa. Histopathology is, among other applications, integral to cancer management through the staging and grading of tumours.

Through this partnership, both the companies aim to expand their market base and have planned a phase and region-wise expansion. They intend to make on-demand cutting-edge digital pathology solutions available to leading hospitals in the Middle East region thus taking healthcare and diagnostics deep into the digital age.
