

OnRobot Expo announces global event on collaborative automation

November 19, 2020 | News

Gathers manufacturers, automation experts and Industry thought leaders on 3 Dec 2020 with special attention on pharmaceuticals aspects and food processing

OnRobot has opened registration for '[OnRobot Expo](#)' – a global, interactive digital robotics event focused on collaborative automation and applications. Held online on 3 December (9.30 am to 4.45 pm, Singapore time), the OnRobot Expo will feature keynotes from speakers including Camilo Buscaron, Amazon Web Service's Head of Cloud Robotics Open Source Technology & Strategy, a panel discussion about collaborative automation with robotics investor and Shark Tank creator, Mark Cuban.

The OnRobot Expo will also include insights from James Taylor, OnRobot General Manager for Asia-Pacific, on collaborative automation's potential to boost industries and the workforce in the region. The day will also feature a keynote address from Sue Keay, the CEO of Queensland AI Hub on automation trends in Australia. There will also be a session on collaborative applications from Ben Ong, Senior Sales Manager, Servo Dynamics, an industrial automation solutions provider for Asia.

The OnRobot Expo will provide visitors with 11 expert-led 30-minute presentations on a massive range of topics from lean manufacturing and human-robot collaboration, to an intelligent force sensor solution for collaborative applications and how manufacturers can break down barriers to vision system adoption.

The expo will also have rolling streams for Europe and the Americas on 2 December 2020.

Sessions on popular applications

Developed with a special focus on supporting small-to-medium size manufacturing companies, OnRobot Expo will deliver full demos of OnRobot's expanding range of robotic components from grippers to polishing solutions with How-To Sessions, showing attendees how to implement and get the most out of their robotics investment. Special attention will be given to collaborative applications in metal and metalworking, packaging, food processing, plastics, pharmaceuticals and logistics.

"Collaborative applications enable companies to future-proof their business. The OnRobot Expo is a unique opportunity for manufacturers to meet with product experts and learn exactly how they could benefit from flexible and easy-to use automation solutions," says Enrico Krog Iversen, CEO of OnRobot.

"OnRobot Expo will provide powerful, actionable insights for every visitor, whether you are an expert in industrial robotics that wants to optimize existing automation or you're representing a small manufacturing company exploring collaborative automation for the first time," says Iversen. "And on the business side, our great line-up of speakers will guide visitors through essential topics including return on investment, how to respond to fluctuating market demands and preparing for the future of manufacturing."
