908 Devices expands strategic distribution network in APAC

July 30, 2021 | News

Sartorius Korea Biotech is the new partner in APAC

US-based 908 Devices, a pioneer of purpose-built handheld and desktop mass spectrometry devices for chemical and biomolecular analysis, has announced the expansion of its channel distribution network, adding new international traction and momentum.

908 Devices handheld and desktop devices are now available across six continents in more than 40 countries and configured in any of six languages.

For expansion in Asia-Pacific (APAC) region, the company has partnered with Sartorius Korea Biotech, a leading company in South Korea specializing in providing complete workflows across biopharma process development, manufacturing, and quality control.

“One of our 2021 goals is to drive expansion across our sales channels, customers, and platforms. We are investing significant resources to support our sales organization, partners, and customers to achieve this goal,” said Kevin J. Knopp, CEO and Co-Founder of 908 Devices.
