Beyond Medical Group (Singapore) and SingMed Medical Centre (Cambodia)Ã?Â strengthen Healthcare alliance

August 14, 2024 | News

The alliance will provide Cambodian patients with more effective and timely treatments by connecting care across borders.

Beyond Medical Group Singapore and SingMed (Phnom Penh, Cambodia) have signed a Memorandum of Understanding (MOU), establishing a strategic partnership in the medical sector. This partnership is set to enhance medical services and healthcare quality in the region.

The MOU signing ceremony, was witnessed by Pin Netra, Director General of SingMed Medical Center, and Elayne Soh, CEO of Beyond Medical Group Singapore, along with their specialists including Orthopaedic Surgeon Dr. Jerry Chen, and Senior Electrophysiology Cardiologist Dr. Devinder Singh.

Through this regional partnership, Beyond Medical Group continues to enhance healthcare services and foster the exchange of medical expertise. The alliance will provide Cambodian patients with more effective and timely treatments by connecting care across borders. A key aspect of the collaboration is the establishment of a structured schedule for Singaporean specialists to work closely with Cambodian healthcare providers, improving the speed, affordability, and safety of medical services for both inbound and outbound patients.

The trail-blazing partnership is also deeply rooted in capacity building, with a strong emphasis on resource-sharing and knowledge transfer. Training programs will be implemented to facilitate visits by Singaporean experts and support initiatives that bolster the capabilities of SingMed Clinic. This collaboration will ensure that Cambodian patients receive reliable and high-quality medical care, while simultaneously promoting sustainable improvements within local medical institutions.
