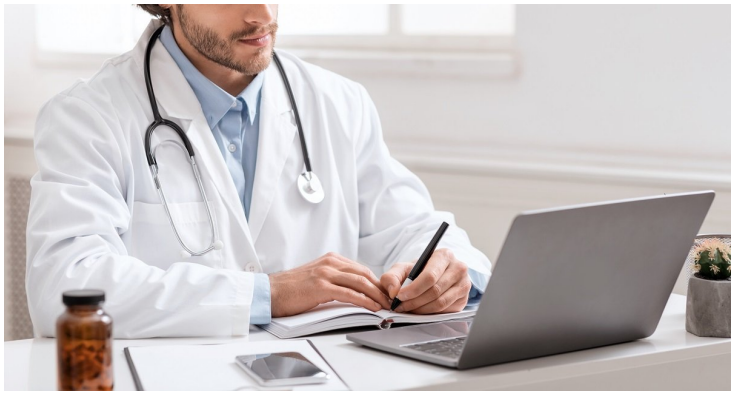
Dr Batra's Healthcare expands global footprint with virtual homeopathy clinic launch in Malaysia

April 17, 2025 | News

Offering Malaysian patients access to experienced and qualified homeopathic doctors



India's Dr Batra’s Healthcare, the world’s largest chain of homeopathy clinics, has announced the launch of its Virtual Homeopathy Clinic in Malaysia. This initiative aims to extend the benefits of safe, natural, and holistic healthcare to people across the country through online consultations and personalised homeopathic treatments.

Dr Batra’s Virtual Clinic will offer Malaysian patients access to experienced and qualified homeopathic doctors, customised treatment plans, and natural remedies for a range of chronic and lifestyle health concerns, all delivered remotely with the same quality of care as its physical clinics.

With its origins in India since 1982, Dr Batra’s Healthcare has grown into a trusted global brand in natural medicine. The organisation currently operates over 200+ physical clinics across 130 cities in 10 countries: India, the United Kingdom, the United Arab Emirates, Bahrain, Greece, Estonia and Bangladesh.

The launch of virtual clinics further expands its reach to Malaysia after Thailand, taking its unique homeopathic treatment model to patients across continents. Dr Batra’s has successfully treated over 1.5 million patients globally, with a treatment success rate of 91%, as authenticated by the American Quality Assessors.
