United Imaging, IHH Healthcare to enhance global access to advanced imaging technologies

April 24, 2025 | News

Improving global access to advanced diagnostic technologies, starting with PET/CT systems

China-based United Imaging, a global leader in medical imaging and radiotherapy equipment, has signed a Memorandum of Understanding (MoU) with IHH Healthcare, a world-leading integrated healthcare provider.

The agreement, announced during the China International Medical Equipment Fair (CMEF) 2025, marks the beginning of a strategic partnership aimed at improving global access to advanced diagnostic technologies, starting with PET/CT systems.

IHH Healthcare operates over 80 hospitals across 10 countries, including Malaysia, Singapore, Turkiye, India, and Greater China, through its portfolio of trusted brands – Acibadem, Mount Elizabeth, Prince Court, Island Hospital, Gleneagles, Fortis, Pantai and Parkway.

The collaboration between the two organisations aims to explore potential synergies involving United Imaging's imaging systems and AI solutions, with a view toward supporting diagnostic advancement and improved patient care.

The initial phase of the collaboration will focus on opportunities to integrate United Imaging's PET/CT systems, providing IHH Healthcare with advanced imaging technologies to support early diagnosis and better treatment planning.
